

MAYUR KALE

Full Stack Developer | AI & LLM Applications

Mumbai, India | mayurkale2207@gmail.com | +91 90969 45267 | linkedin.com/in/mayurkale | github.com/mayurkale

SUMMARY

Full Stack Developer with 5 years of experience building production web applications and AI-powered products. Designed and deployed a multilingual voice-and-text conversational RAG assistant used by enterprise insurance clients for employee training. Strong across React/Next.js, Node.js, PostgreSQL and AWS, with end-to-end ownership from architecture to deployment.

TECHNICAL SKILLS

AI & LLM: Generative AI, RAG, LLM Agents & Agentic Workflows, Conversational AI, OpenAI, Gemini, Prompt Engineering, Vector Databases, Speech-to-Text / Text-to-Speech (ElevenLabs, Sarvam AI), NLP

Frontend: React, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, Material UI, HTML5, CSS3

Backend: Node.js, Express, Fastify, REST APIs, Prisma, Socket.io, JWT / RBAC

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, EventBridge, AppConfig), Docker, Jenkins, CI/CD, Nginx

Tools: Git, Jira, Postman, Agile / Scrum

EXPERIENCE

Full Stack Developer — Sportz Interactive, Mumbai

March 2026 – Present

- Building a multi-tenant no-code site builder for sports clients: drag-and-drop page composition from a reusable component library, with per-tenant isolated configuration and branding
- Implemented admin-side component styling, global theming and font management, so design changes ship without a developer or deployment
- Built configuration-driven component architecture supporting per-tenant rendering

Stack: React, Next.js, TypeScript, Node.js, Fastify, PostgreSQL

Full Stack Developer — Eduvanz, Mumbai

March 2024 – March 2026

- Built a multilingual voice-and-text AI training assistant enabling enterprise employees to learn internal products through natural dialogue; deployed to health insurance clients
- Implemented a RAG pipeline over client-uploaded product documentation using a vector database, grounding responses in source material rather than generic LLM output
- Delivered multilingual voice interaction via ElevenLabs and Sarvam AI, plus an adaptive training mode where the assistant leads conversational Q&A and adjusts follow-ups based on employee responses
- Built a dedicated AI agent per product and a multi-tenant admin for client onboarding and document upload, auto-indexed into the knowledge base
- WIZR marketplace: built a course marketplace and job portal with advanced search and application management, AI-driven mock interviews with real-time feedback, resume builder, skill assessments, payments and role-based access control

Stack: Next.js, Redux, Node.js, Express, Prisma, PostgreSQL, OpenAI, Gemini, AWS

Full Stack Developer — Webinfonex Softwares

July 2022 – March 2024

- Delivered three production fintech platforms end-to-end: a merchant portal for inventory and lead management with reporting dashboards; Stride Marketplace, an EMI commerce platform; and a lender portal for lender data and compliance tracking
- Integrated RESTful APIs across all three platforms, wrote unit tests for functional coverage, and managed sprint tasks in Jira

Stack: React, JavaScript, Node.js, Express, PostgreSQL, Material UI

Full Stack Developer (Freelance Consultant)

June 2021 – June 2022

- Arjunai — stock market analytics platform with advanced filtering, watchlists, interactive visualizations and a simulated trading environment on real-time prices
- NavVed — agricultural marketplace with farmer/merchant dashboards, real-time chat via Socket.io, live auction bidding, Razorpay payments and an admin panel; deployed to AWS EC2 with Nginx

Stack: React, Node.js, Express, MongoDB, Socket.io, Material UI

EDUCATION

Bachelor of Technology — Sanjivani College of Engineering, Kopergaon

August 2019 – June 2023 | CGPA 8.8 / 10
