SUMMARY

Full Stack Developer with five years of experience across sports, education and fintech. Builds web applications using React, Next.js, Node.js and PostgreSQL, working across interfaces, APIs, databases and AWS deployment. Experience integrating document-based AI assistants and streaming voice features into business applications.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, Redux, Tailwind CSS, Material UI

Backend & Data: Node.js, Express, Fastify, REST APIs, Prisma, PostgreSQL, MongoDB, MySQL

Cloud & Deployment: AWS ECS, EC2, Lambda, S3, RDS, Aurora, RDS Proxy; Docker, CI/CD, Nginx

Integrations: WebSockets, Socket.io, RAG, vector databases, speech-to-text, text-to-speech

Tools & Practices: Git, Jira, Postman, Jenkins, JWT, role-based access control

Additional AWS services: EventBridge and AppConfig. Voice providers: Sarvam AI and ElevenLabs.

EXPERIENCE

Full Stack Developer | Sportz Interactive Mar 2026 – Present

- Build a multi-tenant website platform with a shared codebase and separate branding and configuration for each website.
- Developed a drag-and-drop page builder backed by reusable React components.
- Implemented admin controls for component styles, global themes and fonts, reducing the need for code changes for routine design updates.
- Built configuration-driven components supporting per-tenant rendering.

Stack: React, Next.js, TypeScript, Node.js, Fastify, PostgreSQL

Full Stack Developer | Eduvanz Mar 2024 – Mar 2026

- Developed video-based learning, quizzes and role-play assessments with reporting to support employee training.
- Implemented document embeddings and vector retrieval to provide relevant product information during AI conversations.
- Connected frontend and backend through sockets, with streaming speech-to-text and text-to-speech using Sarvam AI and ElevenLabs.
- Built course marketplace and job portal features with search, filtering and application management.
- Delivered interview practice, resume builder and career assessment features.
- Integrated payments, engagement analytics and role-based access across application modules.

Stack: Next.js, Redux, Node.js, Express, Prisma, PostgreSQL

Full Stack Developer | Webinfonex Softwares Jul 2022 – Mar 2024

- Built merchant portals with inventory, lead management and reporting dashboards.
- Developed EMI marketplace features supporting product discovery and commerce workflows.
- Built lender portals with data management, compliance tracking and communication workflows.
- Integrated REST APIs, wrote unit tests and managed sprint tasks and defect tracking in Jira.

Stack: React, JavaScript, Node.js, Express, PostgreSQL, Material UI

Full Stack Developer | Freelance Consultant Jun 2021 – Jun 2022

- Built stock analytics with filtering, watchlists, interactive visualisations and simulated trading; added CSV-based analysis.
- Built marketplace dashboards, real-time chat, auction bidding, Razorpay payments and administration for users, stock and orders.
- Deployed both applications to AWS EC2 with Nginx and custom domains, with authentication

middleware for protected routes.

Stack: React, Node.js, Express, MongoDB, Socket.io, AWS EC2

EDUCATION

Bachelor of Technology

Sanjivani College of Engineering, Kopergaon

August 2019 – June 2023 | CGPA: 8.8 / 10
